

➡ A Soldier was killed in an off-duty general aviation accident Oct. 8 at approximately 1800 local near Easton, Kan. The Soldier was flying a non-military, two-seat aircraft that crashed in a heavily wooded area. He was pronounced dead at the scene. The aircraft's other occupant, also a Soldier, was listed in critical condition at a local hospital.

#### **Safety Reflection**

• *Aviation and ground accidents can occur any time of day, both on and off duty, but safety is a 24-hour priority. The same principles of composite risk management used to mitigate on-duty accidents are just as applicable and beneficial off the job. Think "safety" in every activity and at all times.*
